## JUNE 2014 TECH SPOTLIGHT

## FEATURED TECH SCOTTSDALE, AZ ALEX TREINEN

Alex is a Registered Nurse and Certified Laser Technician, holding a Bachelor's degree in Kinesiology.

Alex loves all the treatments that NLI offers and as a licensed medical practitioner, her specialty is Botox and dermal fillers.

## FEATURED TECH DALLAS, TX KELLIE JONES

Kellie was born in Houston but now calls Ft. Worth home. An aesthetician for 15 years, she was always interested in the medical side of the business.

She is now in her 7<sup>th</sup> year of teaching at NLI. She gets regular Photofacials and uses Rhonda Allison's Drops of Essence every single day.

## IN THE NEWS:

FOREVER CLEAR™ BBL ACNE — SAY HELLO TO CLEARER SKIN!

Forever Clear<sup>TM</sup> BBL Acne is the latest cutting edge technology from Sciton®, the good folks who have given us multiple ways of making us more beautiful – from reducing wrinkles to treating troubled toenails to melting muffin tops. In this latest and greatest offering, the BBL stands for Broadband Light, a modality that actually stimulates changes in the skin at the molecular level.

Acne is caused by blocked hair follicles and resulting inflammation and bacterial overgrowth. In the past, bacteria was treated internally with oral antibiotics or Accutane and we have since learned of the significant potential side effects of these drugs. Forever Clear™

BBL Acne directly targets bacteria on the skin in a safe, effective way. Even better—with proper treatment, the procedure also treats overactive sebaceous glands and reduces inflammation associated with acne breakouts.

Because **Forever Clear<sup>TM</sup> BBL Acne** addresses the biggest source of acne rather than simply treating its symptoms, clients notice smoother, less oily and beautiful skin with without significant drying or flaking. BBL Acne can be used alone but it's also a wonderful complement to other skin-improving modalities such as microdermabrasion and chemical peels. Treatments last just 20-30 minutes and makeup can be applied immediately. For optimal results, a series of eight weekly treatments is recommended for most clients, with periodic touch-ups as needed depending on acne type and severity.
